(1) The CO<sub>2</sub> emissions entered are mixed and expressed in grams per kilometre. The fuel consumption and CO<sub>2</sub> emission values provided comply with WLTP approval (EU regulation 2017/948). Since 1 September 2018, new vehicles are approved on the basis of the worldwide harmonised light-duty vehicles test procedure (WLTP), which is a new, more realistic test procedure to measure fuel consumption and CO<sub>2</sub> emissions. This WLTP procedure fully replaces the New European Driving Cycle (NEDC), which was the previous test procedure. As the test conditions are more realistic, the fuel consumption and CO<sub>2</sub> emissions measured according to the WLTP procedure are, in many cases, higher than those measured according to the NEDC procedure. The fuel consumption and CO<sub>2</sub> emission values may vary depending on specific equipment, options and types of tyres. Contact your point-of-sale for more information. ## EQUIPMENT DETAILS

### PEUGEOT i-Connect® Advanced

PEUGEOT i-Connect® Advanced offers a complete technological experience, with its high-performance and efficient TomTom® connected navigation. For optimum readability, the map can be displayed on the entire touch-sensitive part of the 21" HD screen or on the digital cluster side, and can be updated 'over the air'. "The 'OK PEUGEOT' function, which uses natural language voice recognition, improves safety and ease of use by providing access to all functions.

\* Included in the Panoramic Navigation pack

### PEUGEOT virtual i-Toggles

Located on a second touchscreen on the dashboard, the Virtual i-Toggles are shortcuts to 10 main functions: air conditioning control settings, navigation, telephone, radio, wall of applications, etc. The Virtual i-Toggles give access to the permanent homepage shortcut, in first position, while the other five shortcuts can be modified according to the user's choice. A swipe of the screen gives access to 5 additional configurable shortcuts.

\* Included in the Panoramic Navigation pack

## Drive Assist Plus 2.0 (semi-autonomous driving\*)

This system combines 4 functions to manage semi-autonomous driving in specific conditions:

- Adaptive Cruise Control with Stop & Go function and Lane Positioning Assist: the vehicle manages steering and speed.
- Semi-Automated Lane Change: assists the driver in overtaking or changing lanes in complete safety.
- Anticipated speed recommendation: based on the vehicle's connected navigation system, it anticipates speed limit changes and suggests the driver to adapt speed accordingly.

\* Included in the 360° Vision & Drive Assist Plus pack.

## PEUGEOT PIXEL LED Headlamps

Adaptive lighting: the system automatically adapts the headlamp beams to traffic conditions, maintaining optimum lighting with 6 specific modes adapted to each driving situation and 2 curves lighting functions. Adaptive High Beam Assit: the system switches to high beam as soon as conditions allow. It detects the contours of vehicles ahead and their movement to create an anti-glare zone and avoid dazzling other road users. At high speeds, a boost function increases the light intensity in the centre of the beam.

## EQUIPMENT DETAILS

### Adaptative bolsters\*

By inflating or deflating pneumatic inserts located in the side bolsters of the backrests, the system allows front passengers to adjust the lateral support of their electrically adjustable seats\* to suit their body shape and driving conditions: tighter for better support and driving sensations, or looser for optimized comfort. These AGR-certified\*\* front seats are also heated, ventilated and massaged (8 programs, 3 intensities). Heated rear side seats.

\* Included with Executive Mistral interior.

\*\* Aktion Gesunder Rücken (German Association for Back Health)

### Clean Cabin

The Clean Cabin system is a complete incoming air management system that acts on pollution both inside and outside the vehicle. Thanks to its high-efficiency filter, it purifies the air inside the vehicle in just a few minutes. The central screen gives the driver access to the indoor air quality index calculated using a particle sensor.
